

MOTION SHEET

I move to add the following bullet to the section titled “Develop Local Solution” on page 52 of the *Austin Energy Resource, Generation and Climate Protection Plan to 2035 – Draft Version 2* as appropriate:

- **A Commitment to Workers:**

Austin is committed to properly valuing and protecting its workers. When developing the standards for programs and the installation of additional generation necessary to achieve the goals set forth in this plan, Austin Energy will prioritize, to the extent allowed by law, the utilization of unionized laborers and advance fair labor practices. Austin Energy will also provide just transition options for its workers whose jobs are impacted by the transition to clean energy.
