## Additional Backup Information:

The contract provides Autodesk AutoCAD, Vault Pro Utilities, ProductivityNow, and IMAGINiT licenses and services for Austin Energy. AutoCAD is a digital blueprint tool used by Austin Energy engineers to design power grids, substations, and other infrastructure designs. It enables precise, scalable, and easily shareable designs for critical utility projects. Vault Pro Utilities is a data management solution that securely stores and organizes computer-aided drafting design files. It supports collaboration by allowing multiple teams to access and share designs while maintaining version controls, tracking changes, and enforcing security permissions for sensitive utility data. ProductivityNow and IMAGINiT provide on-demand training, expert support, and optimize

workflow for Autodesk tools.

Bundling these tools and services under one contract is essential for maintaining a connected design and data management environment. This approach ensures compatibility and provides a scalable foundation for future system upgrades.

An additional year and increased authorization on the current contract is necessary while a new multi-year contract is negotiated.
