Recommendation for Action

File #: 25-0915, **Agenda Item #:** 40.

6/5/2025

Posting Language

Authorize a contract for construction services for the Shoal Creek - MoPac/Steck Water Quality Ponds Retrofit Project for Capital Delivery Services with Dalrymple Gravel & Contracting Co., Inc. in the amount of \$3,331,271 plus a \$333,128 contingency, for a total contract amount not to exceed \$3,664,399. Funding: \$3,664,399 is available in the Capital Budget of the Watershed Protection Department.

Lead Department

Financial Services Department.

Managing Department

Capital Delivery Services.

Amount and Source of Funding

Funding is available in the Capital Budget of the Watershed Protection Department.

Purchasing Language:

The Financial Services Department issued an Invitation for Bids solicitation IFB 6100 CLMC1096 for construction services. The solicitation was issued on February 3, 2025, and closed on March 13, 2025. Of the six bids received, the recommended contractor submitted the lowest responsive bid. A complete solicitation package, including a tabulation of the bids received, is available for viewing on the City's website. This information can currently be found at

https://financeonline.austintexas.gov/afo/account_services/solicitation/solicitation_details.cfm?sid=141730

MBE/WBE:

This contract will be awarded in compliance with City Code Chapter 2-9A (Minority-Owned and Women-Owned Business Enterprise Procurement Program) by meeting the goals with 11.10% MBE and 1.36% WBE participation.

For More Information:

Direct questions regarding this Recommendation for Council Action to the Financial Services Department - Central Procurement at FSDCentralProcurementRCAs@austintexas.gov or 512-974-2500. Respondents to the solicitation and their Agents should direct all questions to the Authorized Contact Person identified in the solicitation.

Additional Backup Information:

The primary purpose of the project is to capture and treat runoff from the upstream drainage area to improve the Environmental Integrity Index scores which measure water quality, physical integrity, non-contact recreation and aesthetics, aquatic life support, and to also reduce pollutant loads discharged into Lady Bird Lake.

This project is a retrofit to a failing stormwater control measure consisting of three sedimentation ponds and

two wet ponds. Two of the three sedimentation ponds will be restored, and the existing two wet ponds will be combined, increasing the overall stormwater control footprint by 27%.

Due to the potential for unknown subsurface conditions, a 10% contingency in funding has been included to allow for the expeditious processing of any change orders to cover any unforeseen construction costs associated with the project. By authorizing the additional contingency funding, Council is authorizing any change orders within the contingency amount.
