### **Additional Backup Information:**

The contract will provide asphalt emulsion products to be used for general street maintenance, such as pothole repairs, spot-paving level-up, utility cut repairs, and annual service plans associated with overlays and seal coat resurfacing. Asphalt emulsion products are environmentally friendly, water-based materials that can be used at low temperature to reduce emissions, fumes, and energy needs. The City performs maintenance on

approximately 10% of the roadway network each year and the use of asphalt emulsion products form a major portion of the maintenance effort.

The recommended contractor is the current provider for these products. The contract will replace a contract which expires January 30, 2027. This was solicited early due to the underestimated usage. The requested authorization is based on historical spending and departmental estimates of future needs.

If the contract is not approved, the City will not have the ability to properly maintain its streets, which will cause safety issues.
