AULCC Review Progress Letter

Each General Permit, or Site Plan, application has specific submittal requirements. All applications will be reviewed for completeness of submittal requirements. It is the responsibility of the applicant, design engineer, or surveyor to ensure that all items required in the submittal packet are complete. If the application is complete, it will be accepted for review and comments. If the application is incomplete, the applicant will be advised of the deficiencies, which must be addressed before the application is accepted for review for a certain cycle.

The applicant must schedule an appointment with Intake at 974-2681 or 974-2689 to submit for a General Permit Program completeness check.

Tracking # :	UCC-240829-01-01	Row Id # :	13354332
Name of Project:	ACCX-Rail Equipment Relocations		
Contact Name:	Mathew Langley	CIP # :	6020.119
E-mail Address :	[REDACTED]		

Project Description: Relocate cabling and housing for the adjacent rail line from inside the convention center to a landscape island outside the convention center

Utility Coordination

This project is in review as part of the AULCC process. The AULCC purpose of this review is to identify and resolve any potential conflicts before construction begins, and to reduce the impact on the transportation system. Additionally, committee efforts shall include identification of facilities, resolution of utility conflicts, and coordination of excavation in the ROW.

Any approval granted by the AULCC Coordinator will not imply that utilities are clear of the proposed construction. All conflicts discovered after the date of this letter, will require resolution by the applicant or owner. This is an AULCC approval only. Applicant must still comply with all General Permit or Site Plan submittal requirements, and all required permitting. All projects with the Downtown Austin Project Coordination Zone (DAPCZ) will require coordination per City Code 14-11-167.

AULCC Comments :

- 1) All possible conflicts may not be represented by information supplied by utilities and departments. Verification of utility locations as represented by the utilities is the sole responsibility of the Design Engineer. Please have the contractor call 811 or 1-800-DigTess for utility locates prior to excavation.
- 2) If utilities with "No Response" status are identified as a conflict, notify the AULCC Coordinator.
- 3) Applicant, or Project Owner, will be required to resolve all conflicts discovered after the date of this letter. If conflict resolution is requested of the AULCC, please resubmit for review.
- 4) Project Owner, or Project Contact, must work directly with utility owners unless a request is made for ATD-ROW Management to coordinate.
