

MOTION SHEET

I move to amend the *Austin Energy Resource, Generation and Climate Protection Plan to 2035 – Draft Version 2* by inserting the following as a new second bullet in the “Continue our Commitment to Decarbonization” section on page 55:

- **Reducing Emissions:** When the utility is able to capture data on customer's emissions separate from their electricity use, such as gas heating, cooking, and/or transportation, the utility should propose moving to goals that seek to reduce total net emissions through tools like beneficial electrification programs.
