

Direct questions regarding this Recommendation for Council Action to the Financial Services Department - Central Procurement at: [FSDCentralProcurementRCAs@austintexas.gov](mailto:FSDCentralProcurementRCAs@austintexas.gov) or 512-974-2500. Respondents to the solicitation and their Agents should direct all questions to the Authorized Contact Person identified in the solicitation.

**Council Committee, Boards and Commission Action:**

July 17, 2024 - To be reviewed by the Water and Wastewater Commission.

**Additional Backup Information:**

The Burrell Drive Wastewater Improvements project is part of the Renewing Austin Program. The Renewing Austin Program is an ongoing effort to replace and upgrade deteriorated and aging water mains with a documented history of multiple breaks, that are in poor condition, and that impact service delivery. In addition, the program coordinates and includes wastewater lines in poor condition and in need of replacement within the project area.

The work consists of the repair and replacement of existing water and wastewater mains with approximately 544 linear feet of 8-inch main along with service lines to individual properties and associated appurtenances and approximately 2,315 linear feet of 12-inch main, manholes, and service lines to individual properties.

This project includes one allowance of \$10,000 that will be used to address any contaminated soil or water remediation. An allowance is an amount that is specified and included in the construction contract or specifications for a certain item(s) of work when details are not determined at the time of bidding.

Due to the potential for encountering unknown subsurface conditions, a 10% contingency in funding has been included to allow for the expeditious processing of any change orders to cover any unforeseen construction costs associated with the project. By authorizing the additional contingency funding, Council is authorizing any change orders within the contingency amount.

The project includes lane closures and detours along Burrell Drive. The contractor will work to ensure that residents always have access to their driveways. If access cannot be maintained, written notice of limited access will be provided to the affected property owner(s) at least 24 hours in advance. Planned water and wastewater service interruptions at each residence will be limited to a couple hours during pipeline tie-in and service reconnections. Residents will be notified at least 48 hours in advance of any water or wastewater service interruptions.

A delay in contract approval will impact infrastructure stability, and increase additional maintenance work.

The contract allows 365 calendar days for completion of this project.

This project is located within zip code 78757 (District 4).
