Direct inquiries to Shawn Willett, 512-974-2021, Garrett Cox, 512-974-9423, or the Project Manager, Cara Lynk, 512-974-5653.

Council Committee, Boards and Commission Action:

January 18, 2023 - To be reviewed by the Water and Wastewater Commission.

Additional Backup Information:

The Onion Creek Odor Control Facility is an existing facility serving the Onion Creek wastewater interceptor and located adjacent to Onion Creek. Past storm events caused erosion into the site, resulting in an increased risk of damage to existing infrastructure. This project will repair existing erosion and protect the site from further damage.

The scope of the project includes constructing a pile wall to stabilize the site which will prevent further erosion and protect the existing wastewater infrastructure. Additionally, a chain link fence will be constructed to secure the site.

Due to the potential for unforeseen conditions, a 5% contingency in funding has been included to allow for the expeditious processing of any change orders. A contingency is an additional amount of money added to the construction budget to cover any unforeseen construction costs associated with the project. By authorizing the additional contingency funding, Council is authorizing any change orders within the contingency amount.

There will be minimal impact to the public as the work will occur within a City easement that is not open to the public.

If approval of this contract is delayed or deferred, site erosion will continue to progress and the risk of damage to the infrastructure will continue.

The contract allows 150 calendar days for completion of this project. This project is located within zip code 78747 within the City's Extraterritorial Jurisdiction.

Forsythe Brothers Infrastructure, LLC is located in Manor, Texas.

Strategic Outcome(s):

Health and Environment.
